

*All electronic tolling means
no stopping or slowing
for tollbooths—kind of like this.*

and get your  today.

When all-electronic tolling begins on the Elizabeth River Tunnels, you'll pay automatically using an E-ZPass mounted to your windshield, or even with just your license plate. That means no tollbooths. And no tollbooths means no slowing or stopping to pay, and no hassles.

Tolling will provide improved safety and more lanes. It's the fastest way to get things moving.

All-electronic tolling starts February 2014 on the Downtown and Midtown Tunnels. For the lowest possible rate and E-ZPass locations, use the contact information above.
